

FM Cloud solutions

Secure, scalable FM private cloud

What is it?

Fully Managed by TELUS Business offers businesses affordable, secure and easily scalable private cloud-based server hosting. A cloud or virtual server delivers computing services such as storage, data, networking, etc. over the internet.

Fully Managed works with you to build a customized solution that protects your data, improves efficiency, security, and decreases overhead.

A modern approach for business

Companies worldwide have seen the advantages of moving their data to the cloud. Physical servers are susceptible to damage, have limited storage, and need replacing every 3-5 years. Defined monthly operating costs make the cloud an attractive option for your accounting department.

Built-in business continuity and disaster recovery, means you are better prepared in a crisis. The cloud also meets modern demands for workplace flexibility - maximizing team productivity with anytime/anywhere access to data.

What can FM Private Cloud do?

Learn more about what moving to FM Private Cloud can do for your business. Our certified experts can design a custom solution based on what you need today - with scalability as you need it.

With Fully Managed, you can feel confident that your data, will be secure, protected, and available to you 24/7/365 from anywhere.
